

Thinking about buying
a pinpointer metal detector?

Don't do it!

Unless it has the following features...

Product Features

- **Pulse Induction (PI)** - This technology allows hunting at the beach in salt water or in any type of soil, including black sand.
- **True target direction** - The Vibra-Probe 580 detects at the tip only, not along the shaft, enabling precision target pinpointing.
- **Waterproof** - Unique sealed design allows the Vibra-Probe to be used in the rain, mud, or under water to a depth of 100 feet.
- **Automatic tuning** - The state of the art microprocessor controlled design requires no adjustments of any kind.
- **Tilt On and Off** - No push button switches. The Vibra-Probe 580 turns on and off when pointed upward or will automatically turn itself off one minute after the last detection.
- **Communicates with vibration** - The Vibra-Probe 580 signals with pulses of vibration when a target is located. It replaces the need for buzzers that can be difficult to hear, especially when wearing headphones from a primary detector.
- **Detection depth stability** - New advanced circuitry maintains the unit's detection distance throughout the life of the battery.
- **Target distancing** - The pulses of vibration increase in frequency as the probe tip approaches the target.
- **Low battery indicator** - Built in low battery sensor alerts you when the battery is low and needs replacing.
- **Easy battery installation** - The standard nine-volt battery is quickly changed without tools. Simply rotate the rear knob and pull out the compression seal to access the battery compartment.
- **Solid construction** - The Vibra-Probe's rugged sealed construction and stainless steel hardware are built to last.
- **Holster** - Includes belt mountable holster for easy carrying.

Vibra-Probe™
Pinpointer Metal Detector
580

The Vibra-Probe 580 Pinpointer metal detector is a miniature version of a primary detector. It's the only pinpointer that communicates through vibration, incorporates Pulse Induction (PI) technology, is waterproof to a depth of 100 feet and includes a belt mountable holster.

The Vibra-Probe 580 is fully automatic. The self-calibrating microprocessor controlled circuitry requires no adjustments and utilizes automatic on and off. The modern electronics and simple to use design makes locating elusive targets easy in any environment including grass, mud, dirt, sand, black sand, or even in fresh or salt water.

Vibra-Probe 580 Specifications

- Detection Type** • Pulse Induction
- Search Mode** • All metal
- Overall Length** • 14 inches (35 cm)
- Tip Diameter** • 1 inch (2.5 cm)
- Weight** • 8 oz. (227 grams)
- Power** • Standard 9 volt battery
- Warranty** • 1 year
- Battery** • Included
- Holster** • Included

Specifications are subject to change without notice.
